Timeline

Game setup

Each player is dealt 3 cards facedown (dates hidden) and places them in front of them.

Draw the top card of the pile, flip it over, and place it in the center of the play area. This card is the starting card of the timeline in which the players will have to place their cards.

Players play in turn clockwise.

The first player must place one of their cards next to the starting card.

After placing their card, the player flips it over to check if the date is correctly placed on the timeline:

Temporal gaps

Check and End of Game:

- ✓ If the card is correctly placed, it remains where it is faceup.
- ✗ If the card is not correctly placed, discard it in the box. Then, the player must draw the top card of the draw pile and place it facedown next to their other cards without flipping it over.

If a player is the only one to correctly place their last card during a single round, they are immediately declared winner.

If several players correctly place their last card during a single round, they keep playing and draw a card during each round until one of them correctly places their card during a single round. The latter is then declared the winner.
